Project Highlights

Project name:

Toyyibpay 2.0

Desc:

A new payment gateway system by Toyyibpay

Date:

September 2020

Toyyibpay 2.0

Toyyibpay is an online payment gateway with aim to help small and medium businesses to run their operations with low cost as Toyyibpay offers low charge fees or no charge fees at all for every transaction. Toyyibpay has been launched in mid of 2018 as Version 1 by using open source framework which is CodeIgniter framework. Toyyibpay also provides APIs and plugins to be used for developers and businesses to integrate their systems or websites with Toyyibpay. After a year running this online gateway as the customer's registrations and transactions increases, the development team realizes that they need to develop a new version with advanced features to fit customer requirements as requested and to offer more features that might help businesses to run their operations.

Web application for users
to engage in group
discussion and managing
group work

Date:
January 2021

Group Project Organizer

Group Project Organizer was developed as a Web Application using WordPress Framework as a platform for users to engage with group discussion and managing group work. The system was designed to be user friendly while providing tools for administrator to manage their groups members, and projects. Since it is a web application, it is available to multiple platforms such as PC and Smartphones. Some of the features of the application are group creation, topics, polls, reminders, member managing and many more.
