

BITM 2313 HUMAN COMPUTER INTERACTION

ASSIGNMENT 1 (10%)

BITM 2313

SEMESTER 2

SESSION 2020/2021

1.0 Objective

To identify the common design issues of websites and propose solutions based on design principles.

2.0 Introduction

Design activities begin once some requirements have been established. The design emerges iteratively, through repeated design-evaluation-redesign cycles involving users. One of the main design principles for website design is simplicity. Simplicity is certainly an important design principle. Many designers try to cram too much into a screenful of space, making it unwieldy for people to find what they are interested in.

3.0 Requirement

This is an **individual** assignment. In this assignment, you are required to find a website.

- Identify what are the issues/limitations/challenges of the website user interfaces.
- Propose possible solutions to enhance the user interfaces and user interactions by applying the best practise in designing an interface.

Fill out the Appendix A and submit your findings.

4.0 Assessment

Marks will be given based on these criterias:

Criteria	Marks
Design issues	10
Design solutions	10
Total	20

5.0 Submission

The submission dateline is **16 April 2021**. This assignment should be submitted through ULearn.

ASSIGNMENT 1**Name :****Matric No :****Group/Section :**

Site Name	
URL (address)	
Describe the design issues. Example : Navigation, colors, content, usability, etc.	
Propose the possible solutions.
