Lab 1.1: Digital Forensic Investigation Process

1.1.2 Case Study 1

The crime that has been taken place in this case study is leaking the company's classified source code of the new OS's kernel. An investigation on the employees needs to be made to discover the employee that was responsible in leaking the information, starting with the GitHub user, Julias Maxim. Start the investigation by searching for any employee with the name or having a similar alias.

1.1.3 Case Study 2

The crime that has been taken place in this case study is unauthorized use of Ahmad Faizul's money to make purchases online. An investigation on the email source and the link given to understand how Faizul's bank account been compromised. Investigate where the new purchased items were shipped.
