Based on the knowledge gained from the video, list DO and DON'T for processing crime scene and evidence collection in handling cyber crime or incident cases.

First responder dos :-

1. Call for backup (e.g. additional police, medical team)
2. Provide medical attention
3. Secure the scene
 - Establish a perimeter
 - Prevent people from leaving the crime scene
 - Prevent people from entering the crime scene
4. Record the crime scene
 - Video
 - Notes
 - Sketches
 - Photograph

Evidence collection dos :-

1. Find and mark and photograph relevant physical evidence during a search
2. Collect the possible evidence and carriers
3. Collect samples for comparison with the evidence
4. Lower contamination risk (face mask, eye protection)
5. When handling evidence, wear a latex glove to prevent changing the evidence
6. Package evidence separately and label

Don't :-

1. Disturb the crime scene (eating, smoking, open/shut windows)
2. Attempt to remove trace evidence
3. Collect insufficient evidence
