## Lab Task W11

### **Case: Malware Attack**

#### 1. Identify the origin of the attack

- User made a direct call to the executable. Therefore, user either deliberately downloaded the malware, or there was a piece of malware sleeping on the system

2. Using a diagram, illustrate the case scenario based on the findings gathered from the analysis.

## **Case: DoS Attack**

### **1. Identify the origin of the attack**

- FTP brute force attack against FTP server

2. Using a diagram, illustrate the case scenario based on the findings gathered from the analysis.
