BITS 3523 COMPUTER AUDIT & RISK MANAGEMENT
LAB 6 & LAB 7
(GROUP WORK – 5 PERSON)

Vulnerability Scanning

Instructions:
1. Read carefully, understand wisely, and use your own word to answer the entire questions.
2. Submit the softcopy which may contain your answers via the ULEARN portal.

You are required to perform vulnerability scanning against your Windows OS platform. Use Windows Server *OR* Windows OS XP/7/10 (old version without any updates) and any scanning software.

Questions:

1. State each involved steps + print screen necessary action which involve in a process of scanning.
2. List FOUR (4) vulnerabilities which can be found in your Windows, identify the vulnerability scores or CVEs for each vulnerability and discuss the impact of such vulnerability.
3. Give ONE (1) solution to EACH vulnerability which has been highlighted in question (2).
